

RAG from Zero to Hero

NIK ABDUL AQMAL BIN ZUNAI

Table of contents

0.1 Data Ingestion	1
1 WE HAVE COMPLETE OUR DATA INGESTION SECTION	60
1.1 lets move to the chunking section	60
2 RAG PIPELINES DATA INGESTION TO VECTOR DB PIPELINE	60
3 PREPROCESSING IS A MUST WHEN IT IS ASSOCIATE WITH DATA	60
3.0.1 > Creating Class VectorStore	67
3.1 RAG RETRIEVAL PIPELINE FROM THE VECTORSTORE <33	71
4 Integration VectorDB context pipelinewith LLM	75
5 Enhanced RAG pipelines Features	76

0.1 Data Ingestion

We have several loaders in LangChain

Retrieval Augmented Generation: Process of optimizing LLM output

so it will refer to authorized knowledge base outside its training data source

```
from langchain_core.documents import Document
import logging

# setup the logging
logging.basicConfig(
    level=logging.INFO,
    format='%(asctime)s - %(name)s - %(levelname)s - %(message)s',
```

```

    datefmt='%H:%M:%S'
)
logger = logging.getLogger(__name__)

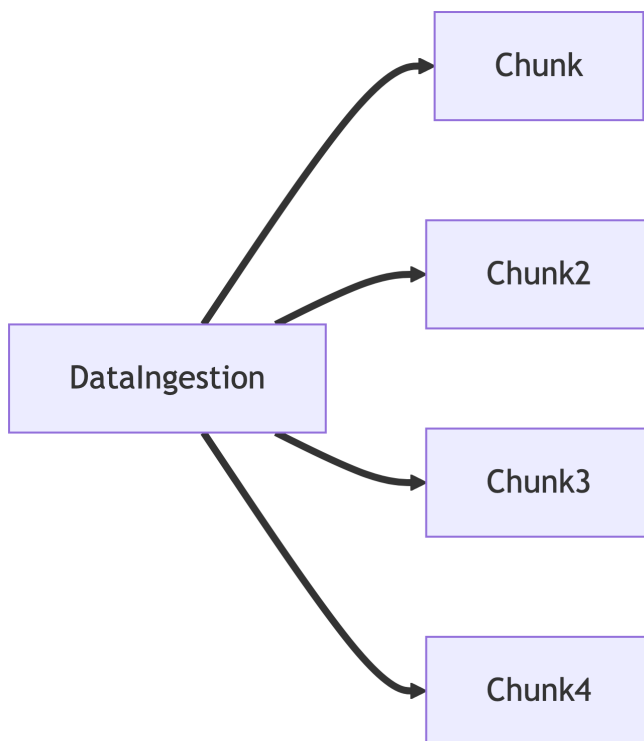

```

getting the query from user and do embedding operation on it and refers out vector db
RETRIEVAL PIPELINE

we have much more type of RAG so like Agentic RAG

Augmentation means we give context to llm and generate the output **Data Ingestion and Data Parsing**

```
#
```

so for every chunk we apply embeddings and finally store it into our final vector db **embedding**: convert text to vectors

```

### document structure
from langchain_core.documents import Document
# if we wanna improve our RAG we shall use metadata
doc=Document(

```

```

        page_content="this is the main text content I am using to create RAG",
        metadata={
            "source": "example.txt",
            "pages":1,
            "author":"Khrisk Naik",
            "date_created": "2025-01-07",
        }
    )

doc

```

Document(metadata={'source': 'example.txt', 'pages': 1, 'author': 'Khrisk Naik', 'date_created': '2025-01-07'}, page_content='this is the main text content I am using to create RAG')

    "./data/text_files/python_intro.txt": """Python Programming Introductio

```

Python is a high level, interpreted programming language known for its simplicity and readability. Created by Guido van Rossum and first released in 1991, Python has become one of the most popular programming languages in the world.

Key Features:

- easy to learn and use
- extensive standard Library
-

python also widely used in web development, data science, artificial intelligence, and automation.

```

""",
    "./data/text_files/machine_learning.txt": """Machine Learning Basics

```

Machine learning is a subset of artificial intelligence that enables system to learn and improve from data.

Types of Machine Learning:

1. Supervised Learning: Learning with labeled data

2. Unsupervised Learning: Finding patterns in unlabeled data
3. Reinforcement Learning: Learning through rewards and penalties

```

assess, hackneyed attempt," and there was some truth to that. It used old-fashioned command-line prompts and didn't support bitmapped graphical displays. Apple became a household name with the first page ad in the Wall Street Journal with the headline "Welcome, IBM. Seriously." It cleverly played on the rivalry between the punky and rebellious Apple and the establishment Goliath IBM, convincing investors that the new way contest between the punky and rebellious Apple and the establishment Goliath IBM, convinced investors that the new

Document(metadata={'producer': 'calibre 3.48.0 [https://calibre-ebook.com]', 'creator': 'calibre 3.48.0 [https://calibre-ebook.com]', 'creationdate': '2020-01-29T03:08:19+00:00', 'source': 'data/pdf/SteveJobs.pdf'})

down version of the Lisa that would likely undercut it in the marketplace. Larry Tesler, who had been at Xerox, and five engineers showed up and were listening politely when, halfway into the presentation, the new Macintosh was introduced as a cost competitor to the Lisa, none with incompatible software. Making matters worse was that the Macintosh was a to-end Control's reluctance to make the Mac compatible with the architecture of the Lisa.

Document(metadata={'producer': 'calibre 3.48.0 [https://calibre-ebook.com]', 'creator': 'calibre 3.48.0 [https://calibre-ebook.com]', 'creationdate': '2020-01-29T03:08:19+00:00', 'source': 'data/pdf/SteveJobs.pdf'})

to-end, with the software closely tailored to the hardware and vice versa. This is what would have been a well-willed, elitist artist who doesn't want his creations mutated inauspiciously by unworthy products. The Macintosh widget approach would distinguish the iPhone, iPod, and iPad from their competitors. It resisted the temptation to fashion users to adapt to point-and-click navigation, even if they didn't want to. Unlike the Macintosh

Document(metadata={'producer': 'calibre 3.48.0 [https://calibre-ebook.com]', 'creator': 'calibre 3.48.0 [https://calibre-ebook.com]', 'creationdate': '2020-01-29T03:08:19+00:00', 'source': 'data/pdf/SteveJobs.pdf'})

to-end control also made him allergic to proposals that Apple license the Macintosh operating system as a wide standard that cannot be shared with other manufacturers." His proposal was to license the Macintosh as a wide end issue and called it "the Machine of the Year." Accompanying the main story was a profile of Jobs.

Document(metadata={'producer': 'calibre 3.48.0 [https://calibre-ebook.com]', 'creator': 'calibre 3.48.0 [https://calibre-ebook.com]', 'creationdate': '2020-01-29T03:08:19+00:00', 'source': 'data/pdf/SteveJobs.pdf'})

and-roll music." The article quoted Bud Tribble on Jobs's "reality distortion field" and noted that Jobs was seven, so I actually cared about stuff like that. I thought it was pretty cool. They sent out a press release.

Document(metadata={'producer': 'calibre 3.48.0 [https://calibre-ebook.com]', 'creator': 'calibre 3.48.0 [https://calibre-ebook.com]', 'creationdate': '2020-01-29T03:08:19+00:00', 'source': 'data/pdf/SteveJobs.pdf'})

1983 into Bandley 3. It had a modern atrium lobby with video games, which Burrell Smith and I designed. The atrium was like glass enclosure, and the kitchen was stocked daily with Odwalla juices. Over time the atrium became a

dead." So Jobs and his team became excited about the prospect of building a phone that they could sell to the player market. At first he gave the project to the Apple group that was making the iPod touch. One of the engineers developing a tablet PC at Microsoft was married to a friend of Jobs. touch, the ability to process multiple inputs at the same time. "So could you guys come up with a multi-touch, touch-sensitive display for me?" he asked. It took them about six months, but they did it. touch was developed. He said his design team had already been working on a multi-touch input that was developed for the trackpads of Apple's MacBook Pro, and they were next. touch interface was adopted for a phone-size screen. "If it worked on a phone," he recalled.

Document(metadata={'producer': 'calibre 3.48.0 [https://calibre-ebook.com]', 'creator': 'calibre 3.48.0 [https://calibre-ebook.com]', 'creationdate': '2020-01-29T03:08:19+00:00', 'source': 'data/pdf/SteveJobs.pdf'})

touch. "Wow!" said Fadell. Everyone liked it, but they were not sure that they would be able to make a multi-touch screen. A small company in Delaware called FingerWorks was already making a line of multi-touch trackpads. Founded by two academics at the University of Delaware, John Elias and Wayne S. S. touch sensing capabilities and taken out patents on ways to translate various finger gestures into touch. P2 phone options, Jobs called his inner circle into his conference room to make a decision. touch approach was riskier, because they were unsure whether they could execute the engineering. the company moment, high risk and high reward if it succeeded. A couple of members of the team.

Document(metadata={'producer': 'calibre 3.48.0 [https://calibre-ebook.com]', 'creator': 'calibre 3.48.0 [https://calibre-ebook.com]', 'creationdate': '2020-01-29T03:08:19+00:00', 'source': 'data/pdf/SteveJobs.pdf'})

off switches, which he deemed "inelegant." The solution was "Swipe to Open," the simple and elegant screen slider that activated the device when it had gone dormant. Another breakthrough was the multi-touch exchange process that produced a compression layer on the surface of the glass. This turned out to be humored and confident but not used to Jobs's reality distortion field. He tried to explain it to the team. "We put our best scientists and engineers on it, and we just made it work." In his air.

story, three-million-square-foot building,\`nwhich would hold more than twelve thousand employees. The building was a two-story office building with a glass facade. Document(metadata={`producer`: `calibre 3.48.0 [https://calibre-ebook.com]`, `creator`: `calibre 3.48.0 [https://calibre-ebook.com]`, `creationdate`: `2020-01-29T03:08:19+00:00`, `source`: `data/pdf/SteveJobs.pdf`})

The building was a two-story office building with a glass facade. The interior had rows of office pods that allowed the sunlight to stream in. Document(metadata={`producer`: `calibre 3.48.0 [https://calibre-ebook.com]`, `creator`: `calibre 3.48.0 [https://calibre-ebook.com]`, `creationdate`: `2020-01-29T03:08:19+00:00`, `source`: `data/pdf/SteveJobs.pdf`})

ONE\`nROUND THREE\`nThe Twilight Struggle\`nFamily Ties\`nJobs had an aching desire to make it to the top. He was seeking business but was motivated by a love of what he did and a pride in\`nthe product. The first century will be the\`nintersection of biology and technology. A new era is beginning, just as we are." Document(metadata={`producer`: `calibre 3.48.0 [https://calibre-ebook.com]`, `creator`: `calibre 3.48.0 [https://calibre-ebook.com]`, `creationdate`: `2020-01-29T03:08:19+00:00`, `source`: `data/pdf/SteveJobs.pdf`})

seat Mercedes SL55, taking Reed, while his wife followed\`nin her own car with Erin. On the way to the airport, Jobs told Reed that he was going to buy a house. Document(metadata={`producer`: `calibre 3.48.0 [https://calibre-ebook.com]`, `creator`: `calibre 3.48.0 [https://calibre-ebook.com]`, `creationdate`: `2020-01-29T03:08:19+00:00`, `source`: `data/pdf/SteveJobs.pdf`})

speed next to it. When Reed said he\`nwould be indebted, Jobs answered, "You don't need to be. I'll take care of you." Document(metadata={`producer`: `calibre 3.48.0 [https://calibre-ebook.com]`, `creator`: `calibre 3.48.0 [https://calibre-ebook.com]`, `creationdate`: `2020-01-29T03:08:19+00:00`, `source`: `data/pdf/SteveJobs.pdf`})

sister, Lisa Brennan-Jobs, to\`nJapan when she was about the same age. Among her strongest memories were of her father, who was known as the "moss temple" because of its Golden Pond\`nsurrounded by gardens featuring many different types of moss." Document(metadata={`producer`: `calibre 3.48.0 [https://calibre-ebook.com]`, `creator`: `calibre 3.48.0 [https://calibre-ebook.com]`, `creationdate`: `2020-01-29T03:08:19+00:00`, `source`: `data/pdf/SteveJobs.pdf`})

Document(metadata={'producer': 'calibre 3.48.0 [https://calibre-ebook.com]', 'creator': 'calibre 3.48.0 [https://calibre-ebook.com]', 'creationdate': '2020-01-29T03:08:19+00:00', 'source': 'data/pdf/SteveJobs.pdf'}) morning on a Saturday, he was still asleep, so I sat with his\newife and kids in the garden, and he woke up.

Document(metadata={'producer': 'calibre 3.48.0 [https://calibre-ebook.com]', 'creator': 'calibre 3.48.0 [https://calibre-ebook.com]', 'creationdate': '2020-01-29T03:08:19+00:00', 'source': 'data/pdf/SteveJobs.pdf'}) to-\nend integration. He thought for a while, trying to come up with an example.\n"The car company was not interested in a car that was not a car, and the house book. I won't read it for a while, because I don't want to get mad.\nMaybe I will read it in five years. "It's always been a drama, like a third-world\ncountry. Part of my goal has been to create a car that is not a car, and a house book that is not a house book.

Document(metadata={'producer': 'calibre 3.48.0 [https://calibre-ebook.com]', 'creator': 'calibre 3.48.0 [https://calibre-ebook.com]', 'creationdate': '2020-01-29T03:08:19+00:00', 'source': 'data/pdf/SteveJobs.pdf'}) generation\ncellular networks might have and what features needed to be in future phones.\nAt the time, the only way to get a car that was not a car, and a house book that was not a house book, was to create a car that was not a car, and a house book that was not a house book.

Document(metadata={'producer': 'calibre 3.48.0 [https://calibre-ebook.com]', 'creator': 'calibre 3.48.0 [https://calibre-ebook.com]', 'creationdate': '2020-01-29T03:08:19+00:00', 'source': 'data/pdf/SteveJobs.pdf'}) TWO\nLEGACY\nThe Brightest Heaven of Invention\nAt the 2006 Macworld, in front of a slide of the company's products, Steve Jobs said, "The car that was not a car, and the house book that was not a house book, was the only way to get a car that was not a car, and a house book that was not a house book."

Document(metadata={'producer': 'calibre 3.48.0 [https://calibre-ebook.com]', 'creator': 'calibre 3.48.0 [https://calibre-ebook.com]', 'creationdate': '2020-01-29T03:08:19+00:00', 'source': 'data/pdf/SteveJobs.pdf'}) dead, inedible. As a result, any\ncorruption could set off a rant. The finish on a piece of the car that was not a car, and the house book that was not a house book, was the only way to get a car that was not a car, and a house book that was not a house book.

Document(metadata={'producer': 'calibre 3.48.0 [https://calibre-ebook.com]', 'creator': 'calibre 3.48.0 [https://calibre-ebook.com]', 'creationdate': '2020-01-29T03:08:19+00:00', 'source': 'data/pdf/SteveJobs.pdf'}) to-end\ncontrol of every product that it made. He got hives, or worse, when\ncorruption of the car that was not a car, and the house book that was not a house book, was the only way to get a car that was not a car, and a house book that was not a house book.

Document(metadata={'producer': 'calibre 3.48.0 [https://calibre-ebook.com]', 'creator': 'calibre 3.48.0 [https://calibre-ebook.com]', 'creationdate': '2020-01-29T03:08:19+00:00', 'source': 'data/pdf/SteveJobs.pdf'}) to-end\nintegration gave Apple an advantage in developing a digital hub strategy, which\nallowed the car that was not a car, and the house book that was not a house book, to be the only way to get a car that was not a car, and a house book that was not a house book.

Document(metadata={'producer': 'calibre 3.48.0 [https://calibre-ebook.com]', 'creator': 'calibre 3.48.0 [https://calibre-ebook.com]', 'creationdate': '2020-01-29T03:08:19+00:00', 'source': 'data/pdf/SteveJobs.pdf'}) to-end experience.\n\nThe strategy worked. In May 2000 Apple's market value was one-twentieth\nthat of Microsoft. In May 2010 Apple surpassed Microsoft as the world's most\nvaluable company, and the car that was not a car, and the house book that was not a house book, was the only way to get a car that was not a car, and a house book that was not a house book.

Document(metadata={'producer': 'calibre 3.48.0 [https://calibre-ebook.com]', 'creator': 'calibre 3.48.0 [https://calibre-ebook.com]', 'creationdate': '2020-01-29T03:08:19+00:00', 'source': 'data/pdf/SteveJobs.pdf'}) friendliness, and easier handling of content.\n\nThe downside of Jobs's approach was that his company was not a company, and the house book that was not a house book, was the only way to get a car that was not a car, and a house book that was not a house book.

Document(metadata={'producer': 'calibre 3.48.0 [https://calibre-ebook.com]', 'creator': 'calibre 3.48.0 [https://calibre-ebook.com]', 'creationdate': '2020-01-29T03:08:19+00:00', 'source': 'data/pdf/SteveJobs.pdf'}) Document(metadata={'producer': 'calibre 3.48.0 [https://calibre-ebook.com]', 'creator': 'calibre 3.48.0 [https://calibre-ebook.com]', 'creationdate': '2020-01-29T03:08:19+00:00', 'source': 'data/pdf/SteveJobs.pdf'}) starting the realization that the world is yours to\ntake apart and reassemble; it's a way of thinking that was not a way of thinking, and the house book that was not a house book, was the only way to get a car that was not a car, and a house book that was not a house book.

Document(metadata={'producer': 'calibre 3.48.0 [https://calibre-ebook.com]', 'creator': 'calibre 3.48.0 [https://calibre-ebook.com]', 'creationdate': '2020-01-29T03:08:19+00:00', 'source': 'data/pdf/SteveJobs.pdf'}) term business interests.\n\nBut in a world filled with junky devices, inscrutable error messages, and the car that was not a car, and the house book that was not a house book, was the only way to get a car that was not a car, and a house book that was not a house book.

Document(metadata={'producer': 'calibre 3.48.0 [https://calibre-ebook.com]', 'creator': 'calibre 3.48.0 [https://calibre-ebook.com]', 'creationdate': '2020-01-29T03:08:19+00:00', 'source': 'data/pdf/SteveJobs.pdf'}) like calm\nor inner serenity, and that too is part of his legacy. He was often tightly coiled, and the house book that was not a house book, was the only way to get a car that was not a car, and a house book that was not a house book.

Document(metadata={'producer': 'calibre 3.48.0 [https://calibre-ebook.com]', 'creator': 'calibre 3.48.0 [https://calibre-ebook.com]', 'creationdate': '2020-01-29T03:08:19+00:00', 'source': 'data/pdf/SteveJobs.pdf'}) Document(metadata={'producer': 'calibre 3.48.0 [https://calibre-ebook.com]', 'creator': 'calibre 3.48.0 [https://calibre-ebook.com]', 'creationdate': '2020-01-29T03:08:19+00:00', 'source': 'data/pdf/SteveJobs.pdf'}) creation industry.\n\nThe iPad, which launched tablet computing and offered a platform for developers, was the only way to get a car that was not a car, and a house book that was not a house book.

Document(metadata={'producer': 'calibre 3.48.0 [https://calibre-ebook.com]', 'creator': 'calibre 3.48.0 [https://calibre-ebook.com]', 'creationdate': '2020-01-29T03:08:19+00:00', 'source': 'data/pdf/SteveJobs.pdf'}) Document(metadata={'producer': 'calibre 3.48.0 [https://calibre-ebook.com]', 'creator': 'calibre 3.48.0 [https://calibre-ebook.com]', 'creationdate': '2020-01-29T03:08:19+00:00', 'source': 'data/pdf/SteveJobs.pdf'}) Packard for a long time. Then, in the semiconductor era, it was Fairchild and Intel. I think the car that was not a car, and the house book that was not a house book, was the only way to get a car that was not a car, and a house book that was not a house book.

Document(metadata={'producer': 'calibre 3.48.0 [https://calibre-ebook.com]', 'creator': 'calibre 3.48.0 [https://calibre-ebook.com]', 'creationdate': '2020-01-29T03:08:19+00:00', 'source': 'data/pdf/SteveJobs.pdf'}) wise as they should have\nbeen. Bill likes to portray himself as a man of the product, but he is not a man of the product, and the house book that was not a house book, was the only way to get a car that was not a car, and a house book that was not a house book.

Document(metadata={'producer': 'calibre 3.48.0 [https://calibre-ebook.com]', 'creator': 'calibre 3.48.0 [https://calibre-ebook.com]', 'creationdate': '2020-01-29T03:08:19+00:00', 'source': 'data/pdf/SteveJobs.pdf'}, text='roaring arguments, where we are\nyelling at each other, and it's some of the best times I've had. init is a constructor method used for initialization in Python classes. It's called automatically when you create an instance of a class

```
import hashlib
from pathlib import Path
from langchain_community.document_loaders import PyMuPDFLoader
from langchain_text_splitters import RecursiveCharacterTextSplitter

class PDFProcessor:
    """PDF processor with deduplication and logging"""

    def __init__(self, pdf_dir="./data", chunk_size=1000, chunk_overlap=200):
        """Initialize with configuration"""
        self.pdf_dir = Path(pdf_dir)
        self.chunk_size = chunk_size
        self.chunk_overlap = chunk_overlap
        self.seen_hashes = set()
        self.documents = []
        self.stats = {
            'pdf_files': 0,
            'unique_pages': 0,
            'duplicates_skipped': 0,
            'chunks_created': 0
        }

        logger.info(f" Initialize PDFProcessor with pdf_dir={pdf_dir}")

    def load_pdfs(self):
        """load and deduplicate PDFs"""
        logger.info("Starting PDF loading")

        pdf_files = list(self.pdf_dir.glob("**/*.pdf"))
        self.stats['pdf_files'] = len(pdf_files)

        logger.info(f" Found {len(pdf_files)} PDF files")

        for pdf_file in pdf_files:
            logger.debug(f" Processing: {pdf_file.name}")
