

Organized Crime and Cyberterrorism

Things to Cover

- Organized Crime on The Internet
- Traditional Crime Augmented with Computer Systems
- Computer Crimes Executed by Organized Groups
- Cyber Terrorism
- Economic Attacks
- Information Warfare
- Cyber Espionage

Organized Crime on The Internet

- Internet Organised Crime Threat Assessment (IOCTA) 2018

<https://www.europol.europa.eu/internet-organised-crime-threat-assessment-2018>

IOCTA 2018

Ransomware retains its dominance

As criminal abuse of cryptocurrencies grows, currency users and exchangers become targets

DDoS continues to plague public and private organisations

Cryptojacking: a new cybercrime trend

Production of Child Sexual Exploitation Material continues

Social engineering still the engine of many cybercrimes

Card-not-present fraud dominates payment but skimming continues

Shutters close on major Darknet markets, but business continues

Traditional Crime Augmented with Computer Systems

Are they really that different?

Cyber organized criminals have utilized information and communication technology (ICT) to facilitate various forms of traditionally offline organized crime activities, such as the smuggling of migrants and trafficking in persons, wildlife, drugs, firearms, and cigarettes trafficking

Computer Crimes Executed by Organized Groups

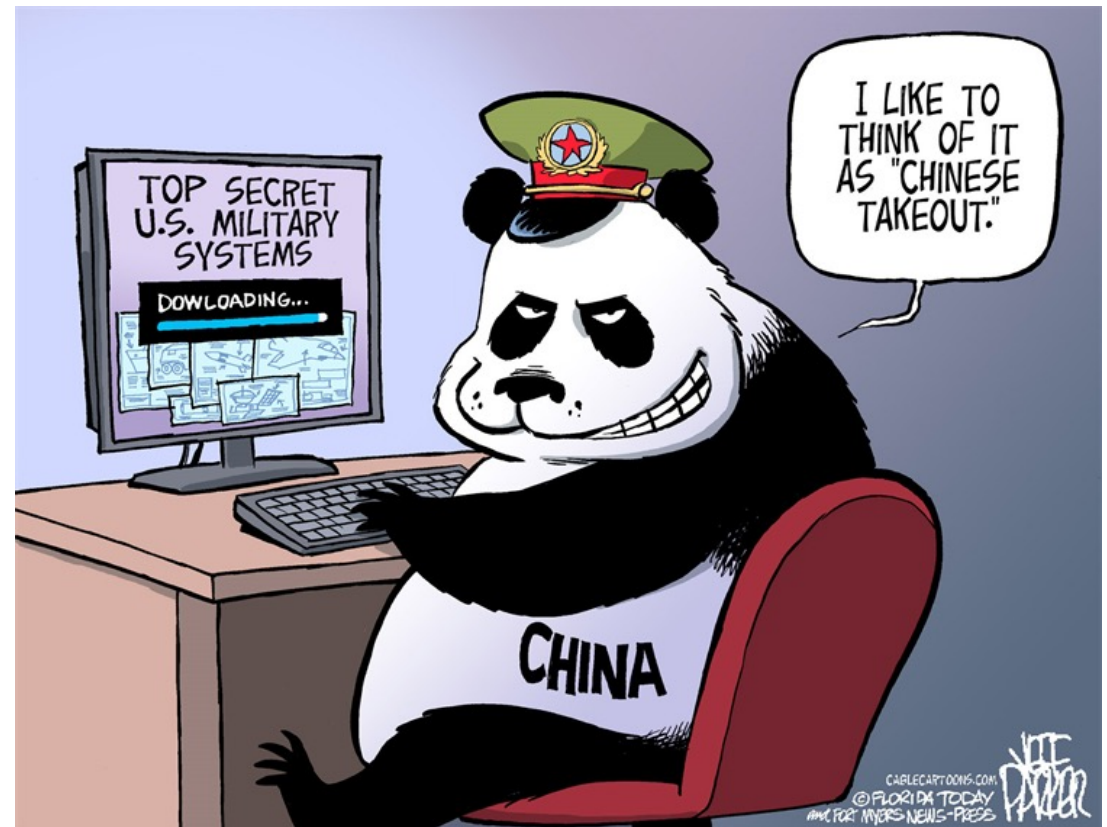

- Ocean Eleven, Twelve, 13, ...Ocean 8...? VS James Bond
- The New Mafia – Gangs and Vigilantes

Cyber Criminals are no longer isolated/individualized acts, pervasive & savage practices run by organized groups

- Traditional criminals
 - State sponsored attackers
 - Ideological attackers
 - Hackers-for-hire
- Refer to this [paper](#) on organized crime

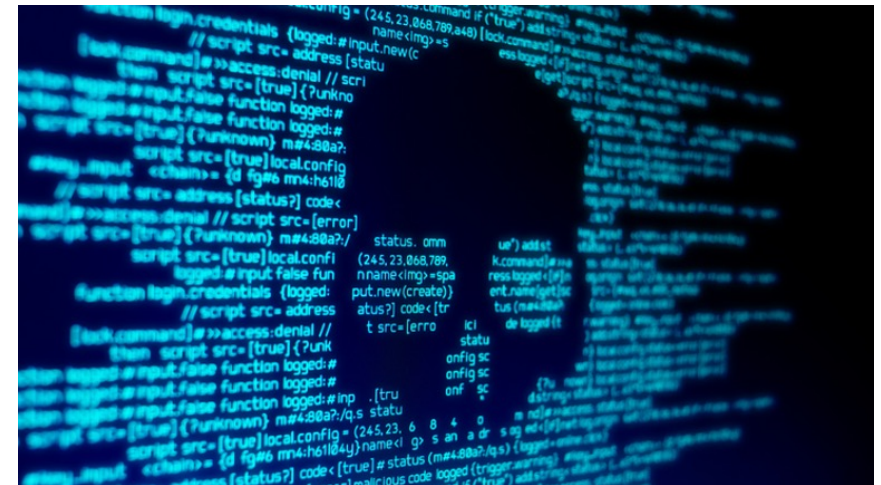

Cyber Espionage

Cyber espionage is an act of gaining unauthorized network or system access, usually to obtain the sensitive data of a government or a military infrastructure using proxy servers. This notorious practice is an attempt to damage or misuse compromised data, which usually refers to political, economic, or military data. In the world of cyber espionage, the threat actors are generally either state-affiliated actors or nation-states with the motive of strategic advantage.

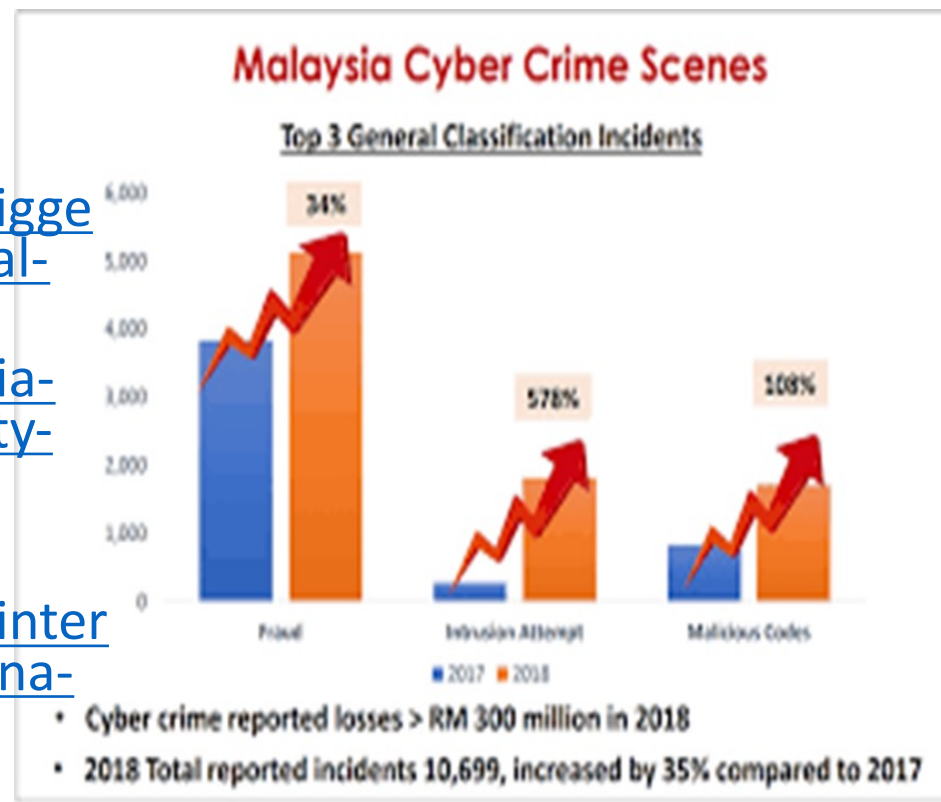

Cyber Terrorism

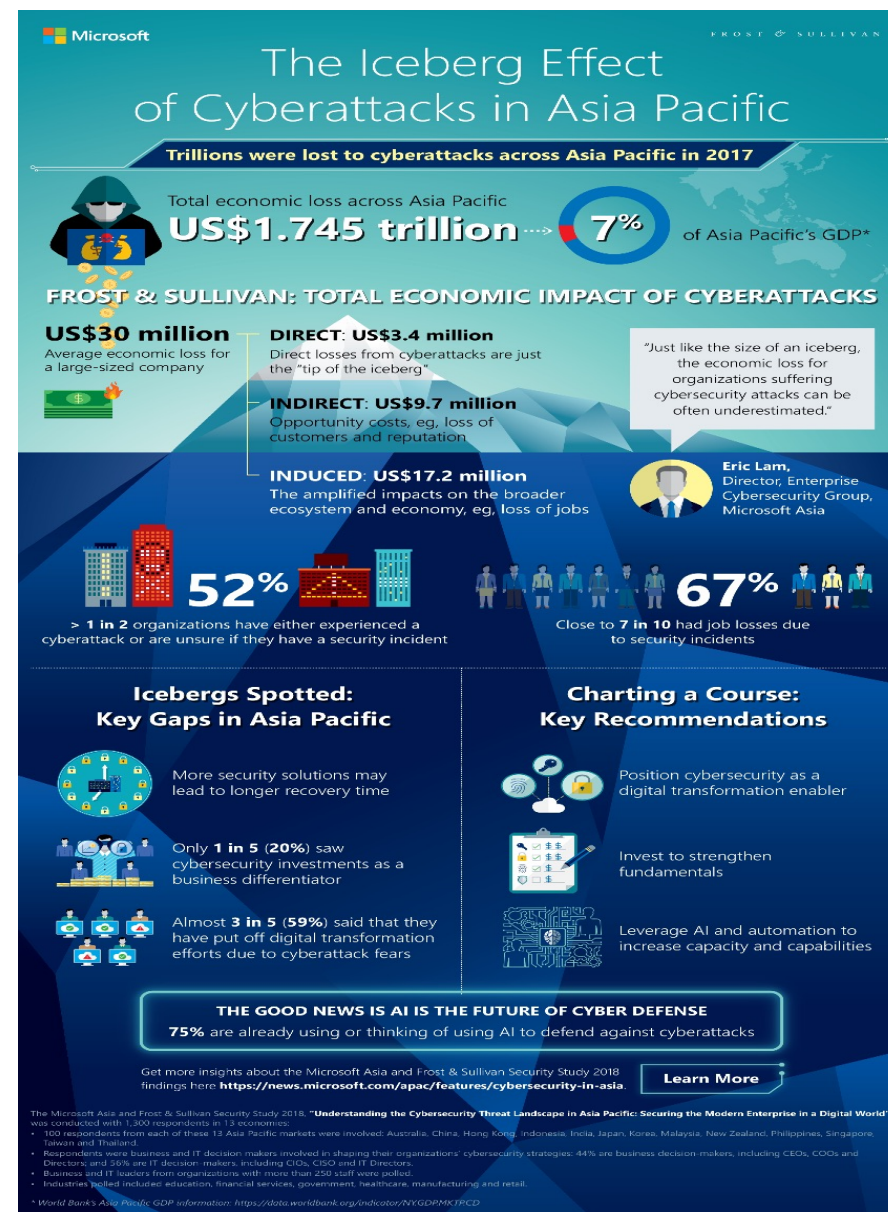

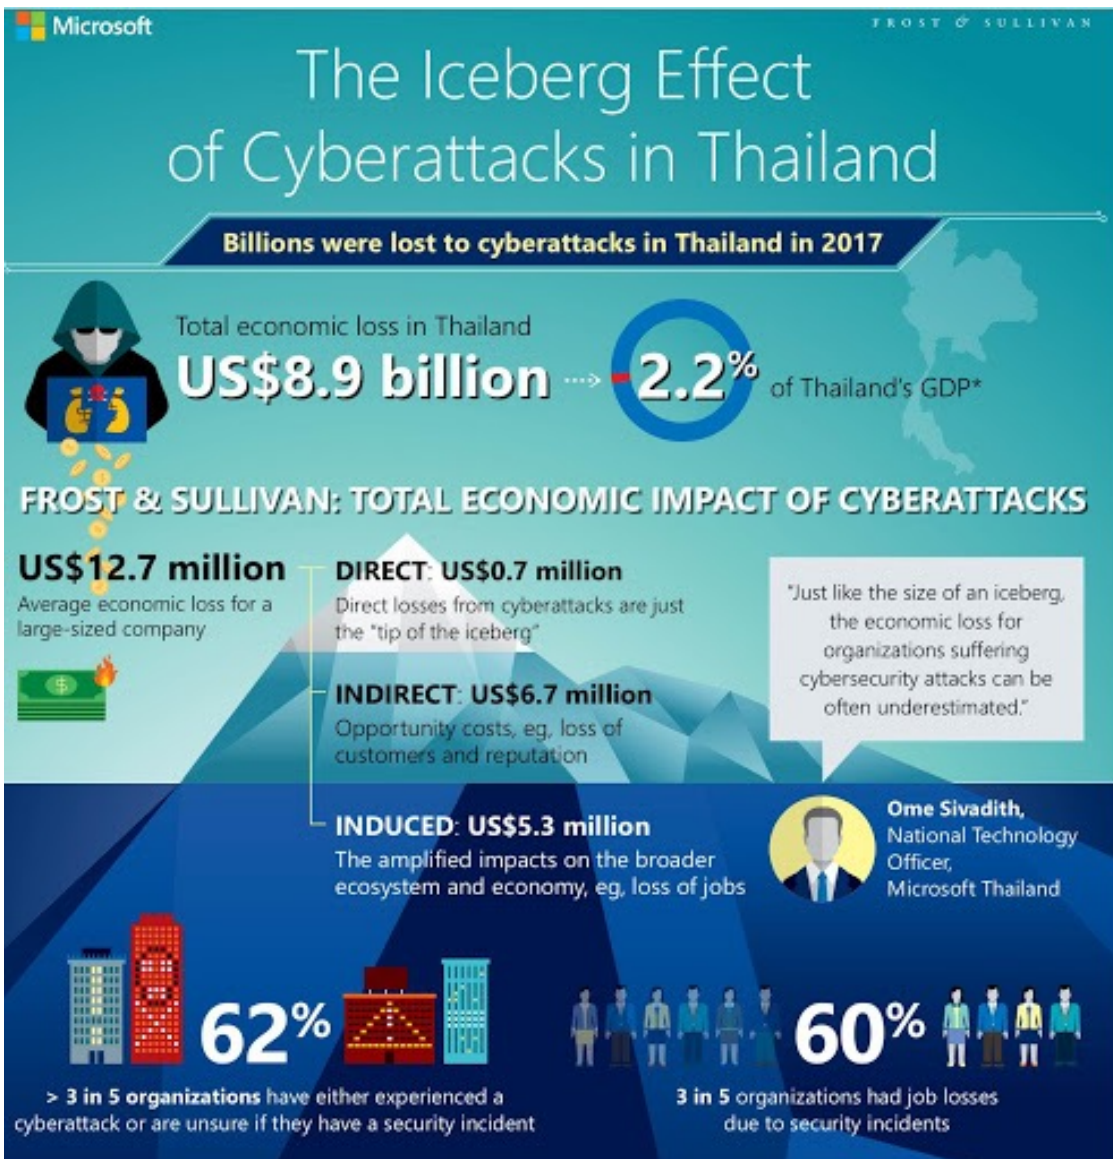

- “the politically motivated use of computers and information technology to cause severe disruption or widespread fear in society”
- Cause FEAR
- Anonymous Claims To Avert Possible Terrorist Attack On Italy

Information Warfare

Information warfare is the manipulation of **information** trusted by a target without the target's awareness so that the target will make decisions against their interest but in the interest of the one conducting **information warfare**.

For discussion; try to find out the latest investigations done on information warfare. Present it in class on Thursday.
